

LEARNING IN THE LIMELIGHT

@Ruskin

This week in PSHCE...

This week Year 7s have been completing the Bounce Together surveys in their PSHCE lessons. These surveys are useful in assessing how well our Year 7 students have settled into life at Ruskin as part of their transition from primary school. Students have been using computers to complete these surveys and the results will help to aid staff in school to further support students to help to settle into secondary school.

In Year 8 lessons they have been learning about Dweck's Growth Mindset and how being resilient will help them to achieve their goals. Students have been learning about the differences between what a 'Fixed Mindset' and a 'Growth Mindset', and how having a Growth Mindset can create positive outcomes for them. They have also been looking at aspirations for future careers and exploring how success can look different to each individual. We have lots exciting future careers plans: from professional footballers to social workers, veterinary surgeons to solicitors.

of

Year 11 have continued their preparation for preparing for the world of work. Last term all of Year 11 had the opportunity to create their own cover letters and CVs ready for applications for job opportunities and for their next steps in education. This week Year 11 began exploring interview skills, readying them for interviews for college and work, as well as for work experience. Next lesson they will get the opportunity to apply their knowledge by taking part in mock interviews to help themselves and their peers to successfully prepare for these scenarios.
