

LEARNING IN THE LIMELIGHT

@Ruskin

This week in Computing and Business...

Year 10 Business Studies

Students have discovered how businesses can generate finance in order to start a business and help a business to thrive. Students have investigated short and long term sources finance and have been putting their maths skills to the test by calculating revenues, costs and profits!

Year 10 iMedia

Students haven started their non-examined assessment. They have been creating a logo for a new game.

Year 7

Year 7 have finished their Scratch projects. They have been looking at event based programming using “build your own blocks” software. We have had many wonderful games made where students have used loops, iteration and variable.

Year 10 Computer Science

It's all about Networks for year 10 Computer Science students. They have looked at different topologies, protocols, layers, LAN vs WAN and the hardware needed to build a network.

Year 8

Year 8 have been programming in Python! They have made a turtle draw lots of different shapes (think Spirograph) whilst learning some exciting programming skills.

Year 9

Year 9 have made their own website using HTML. They have learnt what makes a good website and used that knowledge to ensure their website follows those rules and keeps people clicking on their site.

Learning Together. Achieving High Standards.
