

# LEARNING IN THE LIMELIGHT

@Ruskin

## This week in DT ...

Year 8 have been making pizza. The idea was to look at how cheap and easy it is to make a pizza instead of getting a take away.

The inclusion of vegetables helped to make the pizza healthy and nutritious.

Year 9 have been coding Microbits. This is part of our Wearable Technology project which runs through the core areas of Empathise, Define, Ideate, Prototype, Test.

In Y7 students are making a copper dog tag. They have completed their design work and are now in the workshops cutting and shaping the tags with a variety of tools and equipment.
